10. (Five-Times Amended) A system for producing and processing a paper document, comprising:

token generating means for generating user-selectable tokens relating to at least one other document, the other document being an electronic document, for purposes of linking the other document;

encoding means for encoding the generated tokens;

printer means for printing the encoded tokens onto the paper document; and a selector means for selecting one or more of the user-selectable tokens that have been decoded from a list of decoded tokens.

19. (Five-Times Amended) A method for producing and processing a paper document, comprising:

generating user selectable tokens relating to at least one other document, the other document being an electronic document, for purposes of linking the other document; encoding the generated tokens;

printing the encoded tokens onto the paper document; and selecting one or more of the user-selectable tokens that have been decoded from a list of decoded tokens.

28 (Amended) A system for processing a paper document, comprising:

a scanner that reads embedded tokens in the paper document;

a segment token decoder that receives image data from the scanner and identifies and decodes the tokens in order to generate a list of decoded tokens; and a token selector that allows a user to select which decoded tokens to access

from the list of decoded tokens.
